

AI Presentation Design Engine

A reusable deck builder that combines content JSON, designer theme JSON, design planning, and headless PowerPoint rendering.

What this version adds

Deck-wide design pairs for visual rhythm and references

More layout variants and training-specific slide types

Regulatory tables and compliance matrices

Preview rendering and contact-sheet review workflow

The system has four layers

Content JSON: slide titles, bullets, tables, metrics

Theme JSON: colors, fonts, spacing, design tokens

Planner: adds variants and design metadata

Renderer: generates PowerPoint from planned deck
