

AI Presentation Design Engine

A reusable deck builder that combines content JSON, designer-theme JSON, design planning, and headless PowerPoint rendering.

What this version adds

Deck-wide design
pass for visual
rhythm and
references

More layout variants
and training-specific
slide types

Regulatory tables and
compliance matrices

Preview rendering
and contact-sheet
review workflow

The system has four layers

Content JSON: slide titles, bullets, tables, metrics

Theme JSON: colors, fonts, spacing, design tokens

Planner: adds variants and design metadata

Renderer: generates PowerPoint from planned deck
