## Content & Bullet Layouts

Standard slides with text, bullets, and key messages

Slide 2 of 22

Slide 2

Version 2.0 | 2024-03-15

## Standard Bullet Slide

The default layout renders a clean card with an eyebrow, title, and bullet list.

- Supports up to 6 bullets per card
- Auto-aligns text to the content
- Theme colors applied to accent bar and typography
- Speaker notes stored separately in Markdown

Slide 3 of 22

Slide 3

Version 2.0 | 2024-03-15

## Key Message Layout

A bold left-panel statement drives the point home.

- High-contrast primary color card on the left
- Supporting evidence bullets on the right
- Ideal for executive summaries and punchy insights

Slide 4 of 22

Slide 4

Version 2.0 | 2024-03-15

## Numbered Insights

- 1. Design tokens drive every color and font decision
- 2. Brand guidelines encoded in theme.json
- 3. Content JSON separates data from presentation
- 4. AI planner assigns layout variants automatically
- 5. Quality report flags mismatches and missing data

Slide 5 of 22

Slide 5

Version 2.0 | 2024-03-15

## Card Grid Layout

- Each bullet becomes its own card
- Up to 4 cards per row
- Icon badge support per card
- Automatic equal-width distribution

Slide 6

Version 2.0 | 2024-03-15

## Two-Column & Comparison

Side-by-side layouts for structured comparison

Slide 7 of 22

Slide 7

Version 2.0 | 2024-03-15

## Two-Column Layout

### Advantages

- Pure JSON input — no UI needed
- Version-controlled presentation source
- AI/CD automated generation

### Use Cases

- Sales decks from CRM data
- Compliance reports from audit logs
- Training materials from LMS exports

Slide 8 of 22

Slide 8

Version 2.0 | 2024-03-15

## Headless Builder vs Manual Design

### Headless Builder

- Minutes to generate a 20-slide deck
- Consistent brand compliance
- Zero design software required
- Fully automatable via CLI

### Manual Design

- Hours of manual slide work
- Brand drift & human error
- Requires PowerPoint or equivalent
- Hard to replicate at scale

Slide 10

Version 2.0 | 2024-03-15

## Key Performance Indicator

94%

Automated Accuracy

Slide content accuracy vs manually authored decks in A/B testing.

- Tested across 500 decks
- Measured by design-system compliance
- Brand guideline adherence scored

Version 2.0 | 2024-03-15

## How the Builder Works

1. Author content with slide data and metadata
2. Define theme join with brand colors, fonts, and design tokens
3. AI planner assigns layout variants and design decisions
4. Renderer builds PPTX slide-by-slide using appropis
5. Quality report and speaker notes exported automatically
6. LibreOffice renders preview PNGs and contact sheet PDF

Slide 20

Version 2.0 | 2024-03-15

## Get Started Today

1. Clone the repo and run npm install

2. Edit input/content.json with your content

3. Run npm run build:deck to generate your deck

4. Review content\_sheet.pdf for a quick visual check

Version 2.0 | 2024-03-15

## References

- 1. Tailwind
- 2. Headless Builder

Headless Builder is a modern, open-source presentation generator. It uses Tailwind CSS for styling and JSON for content. It's designed to be easy to use and integrate into your workflow.
