

Full Feature Demo

Showcasing every slide layout: titles, content, metrics, charts, timelines, tables, quotes, and more.

PART 1

Content & Bullet Layouts

Standard slides with text, bullets, and key messages

Standard Bullet Slide

The default layout renders a clean card with an eyebrow, title, and bullet list.

- Supports up to 6 bullets per card
- Auto-sizes font to fit content
- Theme colors applied to accent bar and typography
- Speaker notes stored separately in Markdown

Key Message Layout

A bold left-panel statement drives the point home.

- High-contrast primary color card on the left
- Supporting evidence bullets on the right
- Ideal for executive summaries and punchy insights

Numbered Insights

- 01 — Design tokens drive every color and font decision
- 02 — Brand guidelines encoded in theme.json
- 03 — Content JSON separates data from presentation
- 04 — AI planner assigns layout variants automatically
- 05 — Quality report flags mismatches and missing data

Card Grid Layout

Each bullet becomes
its own card

Up to 4 cards per row

Icon badge support
per card

Automatic equal-
width distribution

PART 2

Two-Column & Comparison

Side-by-side layouts for structured comparison

Two-Column Layout

Advantages

- Pure JSON input — no GUI needed
- Version-controlled presentation source
- CI/CD automated generation

Use Cases

- Sales decks from CRM data
- Compliance reports from audit logs
- Training materials from LMS exports

Headless Builder vs Manual Design

Headless Builder

- Minutes to generate a 20-slide deck
- Consistent brand compliance
- Zero design software required
- Fully automatable via CI/CD

VS

Manual Design

- Hours of manual slide work
- Brand drift between authors
- Requires PowerPoint or Keynote
- Hard to automate at scale

PART 3

Metrics & Data Slides

Numbers, charts, and risk visualization

Key Performance Indicator

94%

Automated Accuracy

Slide content accuracy vs manually authored decks in A/B testing.

- Tested across 500 decks
- Measured by design-token compliance
- Brand guideline adherence scored

Slide Types Usage Distribution

Distribution of layout types across a sample of 200 auto-generated decks.

- Content slides are most common
- Metric and two-column layouts growing

Decks Generated Per Month

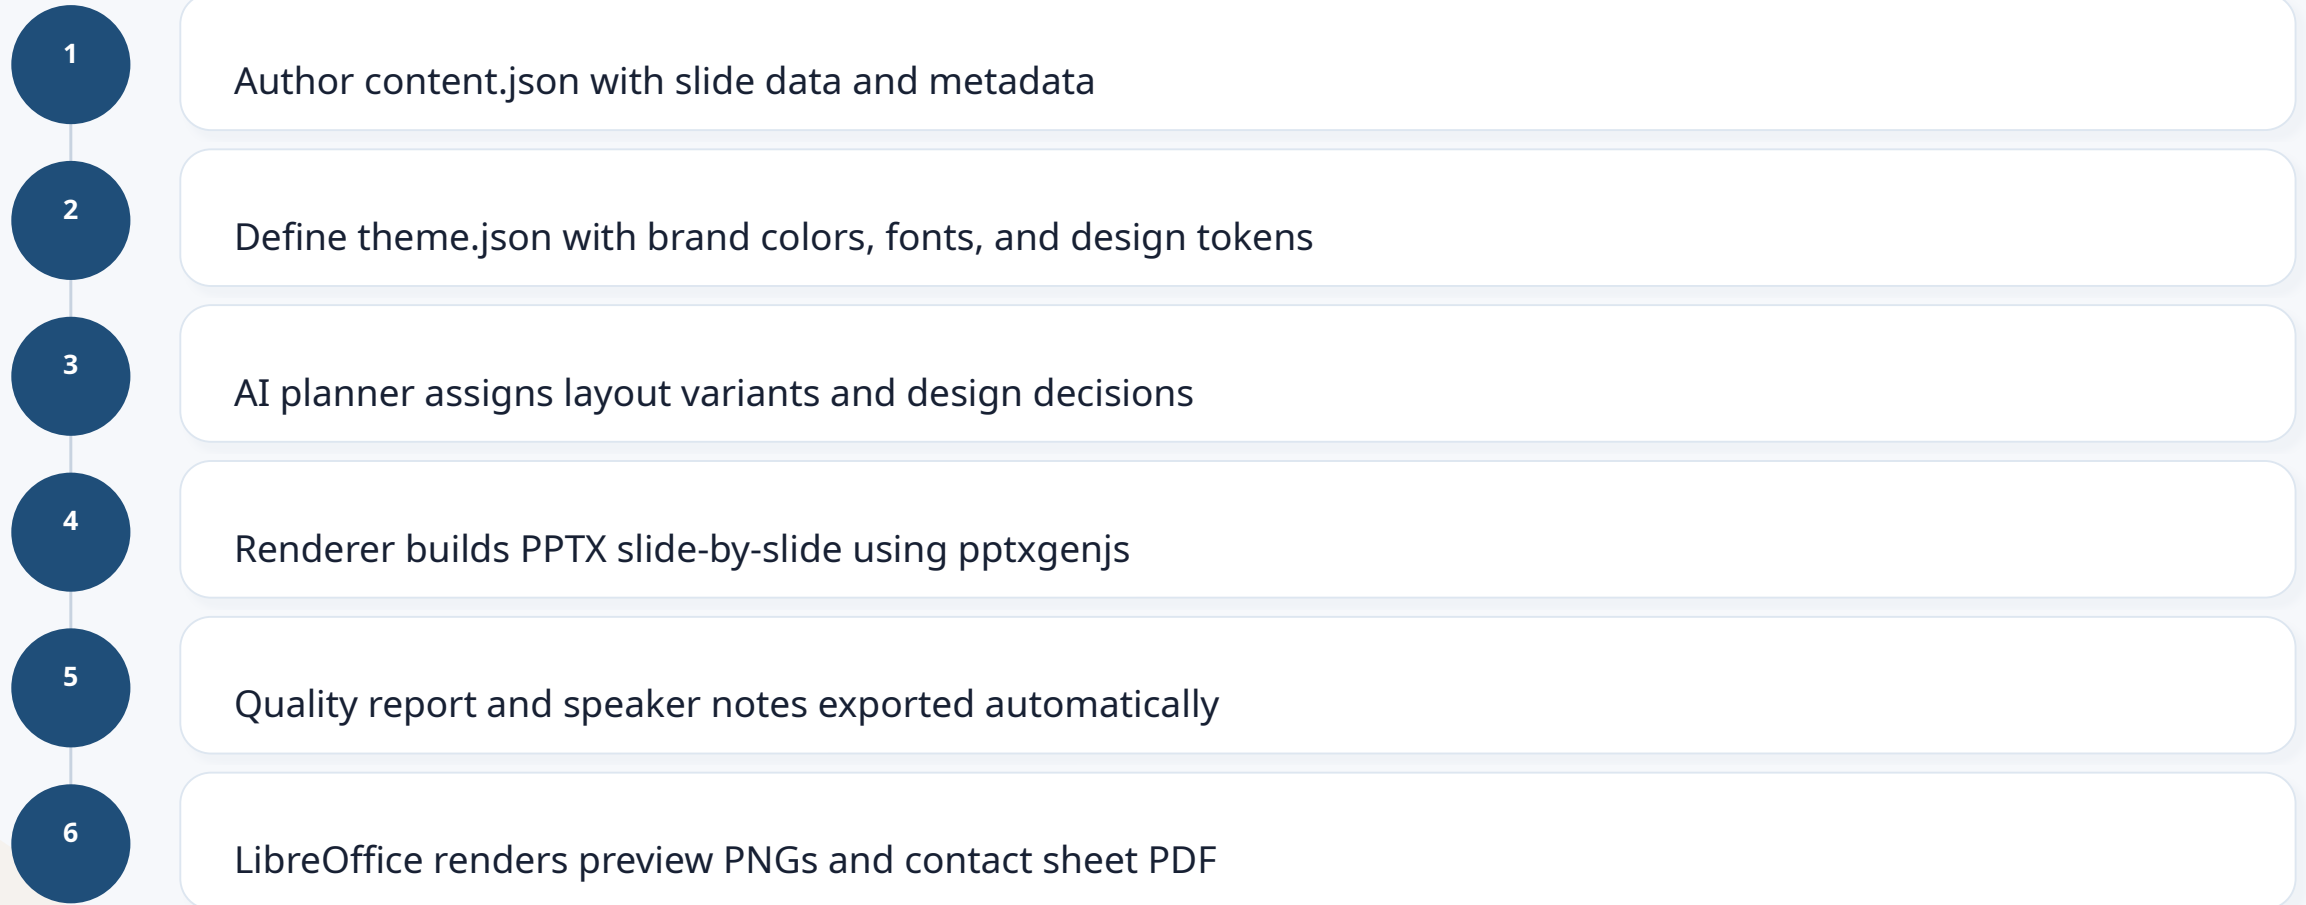

PART 4

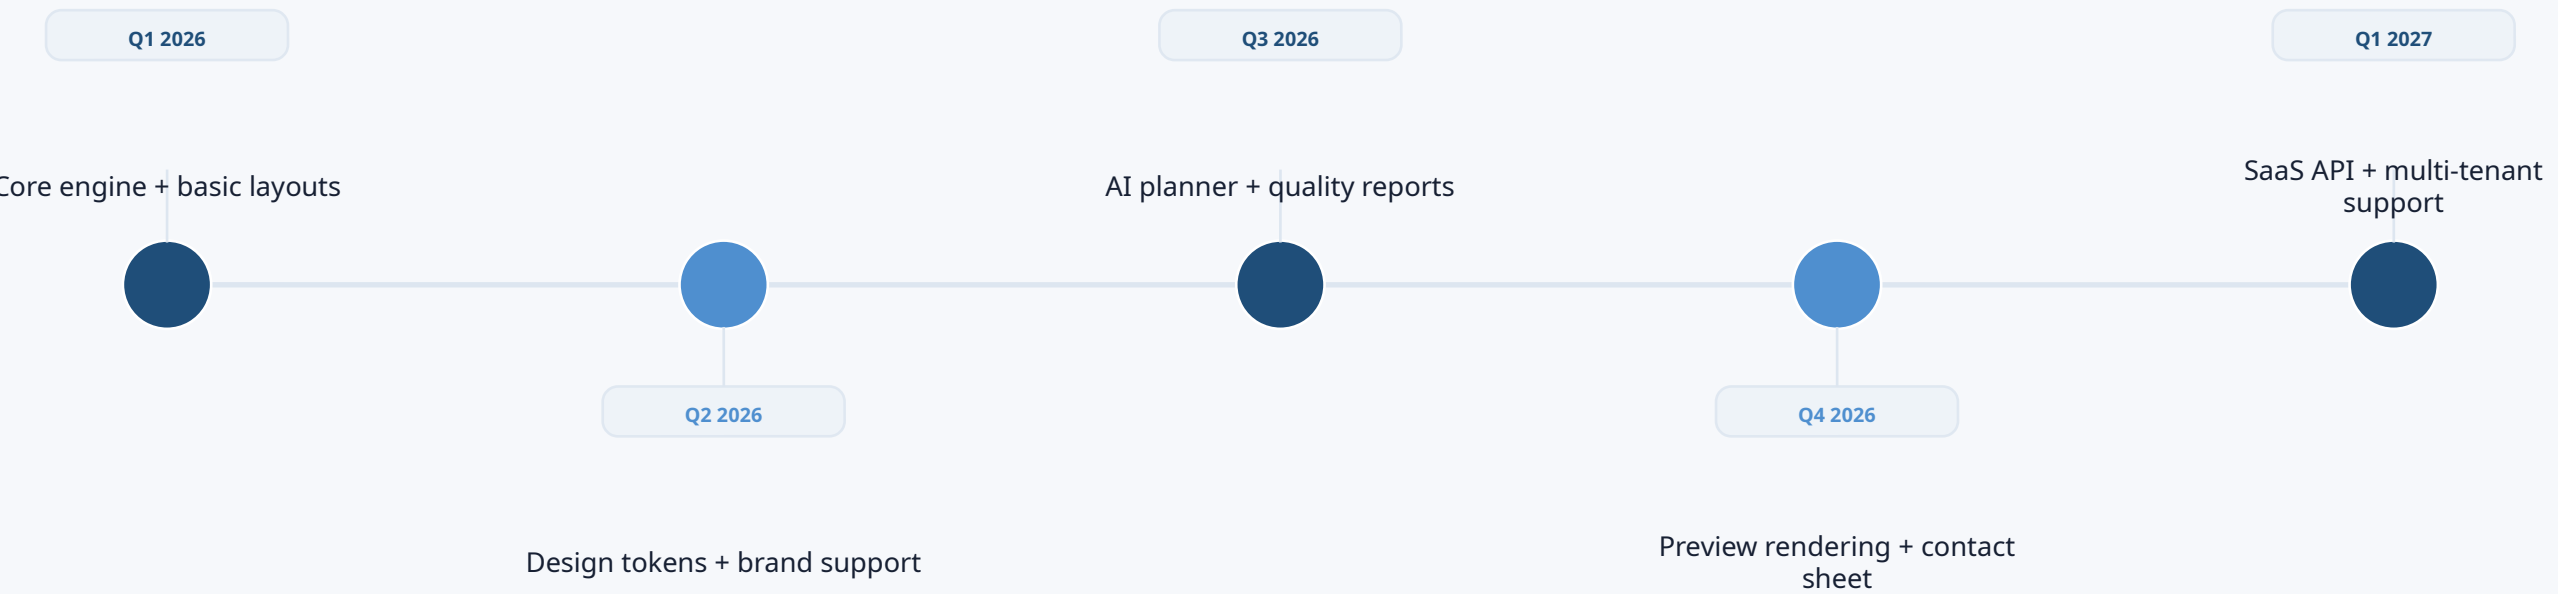

Process, Timeline & Tables

Structured data and workflow visualization

How the Builder Works

Project Roadmap

Supported Slide Types Reference

Type	Variant	Best For	Column Support
title	hero / full_bleed	Opening slide	N/A
section	light / dark	Section dividers	N/A
content	standard / key_message / cards	Text + bullets	1
two_column	standard	Side-by-side info	2
comparison	two_cards / exec_tradeoff	A vs B decisions	2
big_number	standard	KPI highlight	1+side
metric_grid	standard	4-up KPIs	Up to 4
bar_chart	standard	Category data	1+side
line_chart	standard	Trend data	1
process	standard	Step-by-step flows	1

4 rows not displayed by this slide layout.

PART 5

Quotes & Closing

Testimonial and call-to-action slides

“

The best presentation is one where the content drives the design — not the other way around.

— Headless Builder Design Principle

Get Started Today

01

Clone the repo and run
npm install

02

Edit input/content.json
with your content

03

Run npm run build:demo
to generate your deck

04

Review contact_sheet.pdf
for a quick visual check
