Content & Bullet Layouts

Standard slides with text, bullets, and key messages

Slide 2 of 22

Slide 2

Version 2.0 | 2024-03-15

Standard Bullet Slide

The default layout renders a clean card with an eyebrow, title, and bullet list.

- Supports up to 6 bullets per card
- Auto-aligns text to the content
- Theme colors applied to accent bar and typography
- Speaker notes stored separately in Markdown

Slide 3 of 22

Slide 3

Version 2.0 | 2024-03-15

Key Message Layout

A bold left-panel statement drives the point home.

- High-contrast primary color card on the left
- Supporting evidence bullets on the right
- Ideal for executive summaries and punchy insights

Slide 4

Version 2.0 | 2024-03-15

Numbered Insights

- Design tokens drive every color and font decision
- Brand guidelines encoded in theme.json
- Content JSON separates data from presentation
- AI planner assigns layout variants automatically
- Quality report flags mismatches and missing data

Slide 5 of 22

Slide 5

Version 2.0 | 2024-03-15

Card Grid Layout

- Each bullet becomes its own card
- Up to 4 cards per row
- Icon badge support per card
- Automatic equal-width distribution

Two-Column & Comparison

Side-by-side layouts for structured comparison

Slide 7 of 22

Slide 7

Version 2.0 | 2024-03-15

Two-Column Layout

Advantages

- Full JSON input — no UI needed
- Version-controlled presentation source
- AI/CD automated generation

Use Cases

- Table decks from CRM data
- Compliance reports from audit logs
- Training materials from LMS exports

Version 2.0 | 2024-03-15

Headless Builder vs Manual Design

Headless Builder

- Minutes to generate a 20-slide deck
- Consistent brand compliance
- Zero design software required
- Full automation via CLI

Manual Design

- Hours of manual slide work
- Brand drift & human error
- Requires PowerPoint or equivalent
- Hard to replicate at scale

Key Performance Indicator

94%

Automated Accuracy

Slide content accuracy vs manually authored decks in A/B testing.

- Tested across 500 decks
- Measured by design-system compliance
- Brand guideline adherence scored

How the Builder Works

- Author connects with slide data and metadata
- Define theme join with brand colors, fonts, and design tokens
- AI planner assigns layout variants and design decisions
- Renderer builds PPTX slide-by-slide using app logic
- Quality report and speaker notes exported automatically
- SlideOffice renders preview PNGs and contact sheet PDF
